

NationalLED

Advanced Wireless Sports Lighting Controls

National LED offers wireless control systems specifically designed for sports lighting applications. Our solution delivers unmatched flexibility, energy savings, and entertainment value.

KEY FEATURES:

✓ Individual Fixture Control & Zoning

Every fixture is wireless controlled, letting you group lights by pole, aim, or field type for full control over what turns on, when, and how.

✓ Entertainment Effects That Wow

Our system includes dynamic and advanced lighting effects:

- Dynamic effects like sparkles, bursts, sweeps, and chases
- Custom animated scenes for home runs, intros, and logos
- Full RGB, RGBW, and RGBA support for team colors and celebrations

✓ Remote Access from Anywhere

Control lighting remotely via our secure cloud. Custom user access, no VPN, fast setup.

✓ Scene Control for Every Event

Create pre-programmed scenes for games, practices, intros, anthems, or events, all controllable from your phone or desktop.

✓ Self-Healing Mesh Network

Our self-healing mesh connects wireless over thousands of feet, automatically linking on power-up. Perfect for large multi-field setups.

✓ Flexible Installation & Controls

Pick indoor or outdoor stations with push-button access. One hub handles up to 1,000 fixtures or separates scenes by sport or team.

✓ Smart Diagnostics & Alerts

Get real-time alerts for fixture or power issues so you're always first to know and can avoid surprises.

✓ Designed for Municipalities, Schools, and Pro Teams

From high schools to pro stadiums, our scalable system fits any project. Long-term contracts simplify budgeting and reduce hassles.
